WATER BIKE

> WR4

A TRIM SILHOUETTE!

Waterflex launches the supercharged water bike, more fun and more sporty. A bold technological innovation with your comfort in mind, find out what makes the WR5 water bike unique.

The WR4 is an advanced water bike with a flexible and ergonomic resistance system that can be modified to customise a wide choice of exercises. This hydraulic system creates a whirlpool effect, providing a draining massage that stimulates the blood circulation in the lower limbs.

Your legs consequently seem relieved and lighter.

You smoothly tone up the buttocks and reshape the thighs to achieve a slim and refined silhouette. The WR4 is designed for intensive everyday use.

fun and cardio

WATER TRAMPOLINE

WX TRAMP

JUMP FOR FUN

The water trampoline can be used for physiotherapy, aqua-training or just at home with the family. Versatile and suitable for anyone aged 7 to 77 with no contraindications. Improve your coordination, balance and physical condition while having fun.

HEXAGONAL TRAMPOLINE SPECIFICITY

Designed to maximize the contact area and an optimal bounce. They stack easily for quick storage and maximum space savings. The best option for a circuit Training.

MODELS AVAILABLE

The WX TRAMP water trampoline is available in three versions:

Round

Square

Hexagonal

COORDINATION

Promoting movement coordination

FLEXIBILITY

Improves joint flexibility

CARDIO

Cardiovascular exercising for increased stamina

BALANCE

Stimulation of many muscle receptors

BALANCING HANDLE

This optional accessory improves safety for beginners or in class by increasing stability or helping with exercises. Designed with AISI 304 marine-grade stainless steel, monoaxial fixing with simple blocking against the foot of your trampoline. Compatible with all three models.

STABILISERS

The six anti-slip silicon suction feet guarantee excellent stability during use. White stabilisers keep the floor of your pool clean. Suitable for all surfaces (liner, tiles, etc.)

JUMP SURFACE

The mesh jump surface has been chosen to guarantee the best possible jump thanks to smoother movement of the water. Technical fibres that offer durability and permeability for accurate jumping and optimal exercise. Barefoot use recommended.

WARRANTY
2 years

All the trampolines in the WATERFLEX range have a 2 year guarantee for all metal parts and 6 months for wearing parts (e.g. elastics, jump surface, etc).

*Discover the cross
trainer for pool*

CROSS-TRAINER

 ELLY

THE POOL CROSS-TRAINER FOR TOTAL SPORT

The ELLY aquatic cross-trainer is a complete user-friendly exercise apparatus combining the benefits of rowing, cross-country skiing, stepping and cycling. It is used to synchronously work all the muscles in the body. Approximately 80% of the muscles used when exercising! The secret lies in its elliptical action, designed to reproduce natural movements when running as faithfully as possible, while protecting the joints from impacts. The apparatus consists of a spindle on which are fixed two long pedals connected to two vertical handles (lever arms).

FLUIDITY OF MOVEMENT

Elly gives its users a fluidity of movement due to the sealed ball bearings and the pedals' angle of inclination that puts optimum load on the legs. The applied effort is reinforced by the lever arms linked to the wide perforated paddles. The Elly thus creates resistance without obstruction or jolting. Made of stainless steel throughout, the Elly is compatible with all types of water (seawater, chlorinated or brominated). Its castors and low weight make it very easy to move.

BAREFOOT USE

BENEFITS OF THE ELLY

The Elly has many benefits: it gently works on all the muscles in the body, from the lower limbs (thighs, calves, buttocks) to the upper (arms, shoulders, pecs, abs, back), and uniformly tones the glutes.

HOW TO USE THE ELLY

Designed for everyday use, the Elly cross-trainer is your aqua vitality partner. Its sturdiness and high quality finishes are essential features for daily usage.

One of the attractive aspects of the cross-trainer is its great ability to burn fat and thus cause weight to disappear. Exercises are easier than on conventional indoor machines because of the buoyancy of the water and the fact that all the muscles are being used. A significant advantage when seeking encouraging results fast!

There's nothing better than a session to forget one's worries and relax. Exercises can be performed to a musical background, whether rhythmic or not. A fun and motivational way to exercise.

COORDINATION

Promoting movement coordination

VITALITY

Gentle treatment of all muscle group

STAMINA

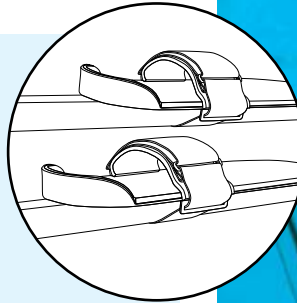

Cardiovascular exercise for gently getting back into shape

SLIMMING

Burn off the fat and retone your body

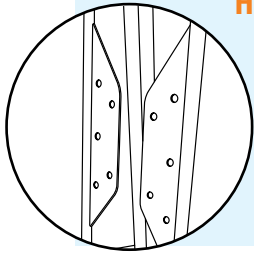

FLUIDITY OF MOVEMENT

due to the sealed ball bearings and the pedals' angle of inclination that puts optimum load on the legs.

HYDRO DESIGN

of the lever arms increases resistance without obstructing movement. Perforations allow the water to pass through gradually to vary the resistance.

Certification : 

WARRANTY
3 years

All the products in the WATERFLEX range have a 3 year guarantee for all metal parts and 6 months for wearing parts (e.g. saddles, foam pool noodles, footstraps, etc).

POOLBAR

*Combine **aquabar** and **aquastep** !
Available in 3 colors*

POLE ON PEDESTAL SYSTEM

POOLBAR

FOR ALL AGES

Whether it's for fun, sport, fitness or rehabilitation, this equipment can be used by people from 7 to 77 years of age, alone or with a partner!

MAKING SPORT FUN

Sculpted abs, refined thighs, firm buttocks, strengthened back muscles, arms more toned, greater cardio-vascular stamina and increased flexibility once more.

Water's massaging action on the body increases the lymphatic drainage effect and is an effective treatment for cellulite, orange-peel skin and fat deposits.

A fantastic way to lose weight and slim down the figure!

OPERATION

The Poolbar jumping pole consists of two elements:
the pedestal and the pole.

- 1) Clamp the pole onto its pedestal.
- 2) Fix the base to the bottom of the pool.

This simple, safe system ensures great stability of the equipment. To dismantle, simply put your foot against the designated points under the pedestal and it comes away in an instant.

FLEXIBILITY
Work your agility and stretching

6 PACK
toned your belly and strengthen your core

COORDINATION
Promoting movement coordination

WELLNESS
Legs feel light, weightless and relaxed

2 IN 1 CONCEPT WATER MULTITRAINER + AQUASTEP

COMBINE AQUAJUMP POLE EXERCISING WITH AQUASTEP!

A highly effective and inexpensive concept as the investment offers the user a combination of multipurpose exercises and the investor a low-cost financial return.

POOLBAR IS UNIQUE THANKS TO ITS ORIGINAL DESIGN

It's the only pole and polyethylene pedestal system offering both aquajump and aquastep at the same time! A combination of two activities for really effective exercises tailored to your needs!

AQUABIKE
LIFT

*Get your water bikes
out of the water
effortlessly!*

LIFTING GEAR

> AQUABIKE LIFT

NEW WATERFLEX PRODUCT

Compatible with all water fitness equipment (treadmill, cross-trainer, water bike, trampoline, etc.), the Aquabike Lift combines mobility, stability, safety and ease of use. Its square handle makes lifting and handling easier and the safety system means a coach can move equipment on their own. It adapts to the most complex pool designs. The Aquabike Lift can be positioned wherever you want, without taking up space at the edge of the pool.

LIFT FEATURES

- ① **Mobility**
Four wheels, including two with a 360° pivot, to make it easy to move even in complex settings
- ② **No fixings**
No change to your swimming pool required
- ③ **Safety stop**
Two silicone feet for stability

ACCESSORIES FOR AQUABIKE

> **MULTI-TRAINING POWER WORKER** **THE FINISHING TOUCH TO YOUR WATER FITNESS EXERCISES**

The Waterflex multi-training power worker has been specially designed to be attached to the rear of water bikes to provide additional water exercises.

It is fast and easy to install. You simply position and fix it behind the WaterRider saddle. This water multi-trainer will enable you to do exercises in addition to pedalling or to stretch after your water fitness session.

> **COMFORT SADDLE** **A WATER SADDLE FOR ADDED COMFORT**

The Waterflex padded saddle is an accessory designed for Waterflex water bikes. This water saddle is specially adapted for larger persons or those with sensitive buttocks.

It has been ergonomically tailored to provide extra comfort during your water fitness session. To preserve your padded saddle, we recommend that you check the pH of the water in your swimming pool – it should be between 6.7 and 7.6.

> **WATER RESISTANCE BAND** **THE ESSENTIAL WATER FITNESS ACCESSORY**

Add to the variety and challenge of your water bike exercise with Waterflex water resistance bands: light and portable. Perfect for all levels of water fitness, this versatile resistance accessory enables you to develop upper body muscle power, target the arms and invigorate the heart.

The flexible slip-resistant handles ensure a firm grip while exercising.

3 resistances = Soft / Medium / Strong

> **RENOV-INOX** **RESTORE THE ORIGINAL SHINE**

Waterflex Renov-inox has been specially designed to maintain submerged stainless steel. The result of collaboration with the ProTech laboratories, it restores the shine on your water bike and protects it against oxidation.

The Renov Inox Pack also contains a product applicator sponge and a microfiber to wipe and gently rub the product to bring back its original shine.

> **INSULATED FLASK 0.6L** **MAINTAINS THE SAME TEMPERATURE FOR 8 HOURS**

The double wall of the Waterflex flask keeps hot or cold liquids at an even temperature for several hours. This 0.6 litre capacity flask is suitable for all kinds of drinks, even carbonated ones. Sport top with press-button opening so you can drink with one hand. Hermetic seal to prevent leaks. Unparalleled food safety: 0 bPA, 0 phthalates, 0 toxins.
